

# Remote Infrastructure Management (RIM)

## Retain Control of your IT Assets

Do you want to retain control of your IT assets, yet lose the headache associated with managing and monitoring complex IT operations? While companies of all sizes look for ways to reduce IT spend and improve customer service, long-term, end-to-end IT outsourcing arrangements are not right for every organization. For some companies, relinquishing control over IT assets isn't the best choice; or expensive data center transitions might not be a viable option, either. However, that doesn't mean your company can't receive other benefits associated with IT outsourcing.

## The Answer is MPY Technologies

MPY Technologies Remote Infrastructure Management (RIM) service offering enables you to retain control of your IT assets, but leave behind the issues associated with day-to-day IT operations management. With our RIM offering, you won't have to worry about staffing your own IT team, MPY Technologies does this for you.

By leveraging our network, MPY Technologies can support all your IT infrastructure support needs remotely. After assessing your IT environment, we will determine which functions can be performed in the most efficient, cost-effective manner. Our ability to shift work quickly and uneventfully reduces cost while enhancing productivity and diminishes the associated risks. Beyond pure costs savings, your organization will experience improved service deliver, security governance and monitoring and maintenance for a healthy environment by leveraging the wealth of knowledge and resources that MPY Technologies provides.

## Partner for Success

MPY Technologies has been delivering RIM services to clients for over 5+ years. We have a robust service offering supporting the middle market from basic requirements to more complex IT environments. With exceptional skills, innovative technologies and superior process expertise, your business performance will be dramatically enhanced without significant up-front capital expenditures or risky transitions.

## THE MPY TECHNOLOGIES DIFFERENCE
